San Jose, CA • kqvo@ucdavis.edu • <https://www.linkedin.com/in/kaitlynqvo/> • <https://github.com/k8tlynvo>

EDUCATION

University of California, Davis | B.S. in Computer Science | GPA: 3.89

Expected Jun. 2026

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming

TECHNICAL SKILLS

Languages: TypeScript, Go, Javascript, HTML/CSS, Python, SQL, C, C++ | **Frameworks:** Next.js, Express.js, Tailwind CSS

Other: React.js, Redux, Node.js, MongoDB, Snowflake, AWS, ECS, CI/CD, GitLab, Figma, Jira, REST API, SDLC, Agile

EXPERIENCES

Application Development Intern

Jun. 2024 - Present

Centene Corporation | Remote

- Developed an internal tool that streamlines a complex data management process for 37,000+ records, reduced processing time by 40% for analyzers, and added the capability to improve the accuracy of the company's public performance metrics
- Collaborated with product managers, engineers, and designers to align on requirements and address technical challenges
- Improved code maintainability and reusability through adhering to industry best practices and guidance from engineers
- Implemented unit tests and efficient debugging to ensure app efficiency and reliability from local development to production

Tools: Golang, AWS, SQL, React.js, Redux, TypeScript, Snowflake, CI/CD, HTML/CSS, GitLab, Jira, API, SDLC, Agile

Software Developer

Oct. 2022 - Jun. 2024

CodeLab | University of California, Davis

- Contributed to 2 large-scale projects with cross-functional teams of 5 developers, designers, and a project manager to build student-focused web applications. Drove the full development lifecycle from requirements gathering to client hand-off
- Implemented key features that addressed specific user pain points and enhanced the academic experiences of UC Davis students, while establishing a scalable foundation for future enhancements and continuous improvement

Tools: React.js, Javascript, TypeScript, HTML/CSS, Next.js, Node.js, Express.js, MongoDB, Tailwind, Figma, API, SDLC

Web Developer Intern

Jul. 2023 - Sept. 2023

SupportHands | Remote

- Developed a cross-platform web and Android app that facilitated the connection of volunteers and unhoused individuals
- Collaborated with a team of 4 engineers to ideate, build, test, demo, debug, and deploy features and enhancements

Tools: React.js, Javascript, HTML/CSS, Node.js, Express.js, MongoDB, Github, API, SDLC, User Authentication, WebSocket

PROJECTS

CommunityCache | Backend Developer | HackDavis

Apr. 2024

- Won "Best Hack for Davis Community Meals and Housing" through consulting stakeholders on user needs and pain points, and collaborating with 3 developers to ideate, design, develop, and deploy a full-stack application in 24 hours
- Built key features including API endpoints and automatic email capability for low-stock items, improving user awareness

Course Visualization | Full-Stack Developer | CodeLab

Oct. 2023 - Jun. 2024

- Developed an application that visualizes hierarchical relationships between 1,000+ major courses for academic planning
- Built RESTful API for managing course data in MongoDB, and utilized Next.js to integrate user authentication
- Implemented interactive and responsive frontend components with React allowing users to search and update majors

SupportHands Web and Android App | Full-Stack Developer | SupportHands

Jul. 2023 - Sept. 2023

- Enhanced the cross-platform frontend design and the chat system with desktop notifications, improving user engagement

ACTIVITIES

Events Lead

Jan. 2024 - Present

CodeLab | University of California, Davis

- Organized, managed, and executed events for 100+ members, fostering community engagement and personal development

Director of Membership

Oct. 2023 - Present

Girl Gains | University of California, Davis

- Compile and analyze feedback data from 50+ members to identify key areas for improvement and drive club strategies
